

Dr. Chiara Chiaffredo DVM, CCRP, owner CVF veterinary physiotherapy center, is the national veterinary director of the Italian agility dog team, a specialized physiotherapist, rehab veterinarian and president of the Italian Society of Veterinary Physiatry. Dr. Chiaras role is to prepare, maintain and provide post treatment services to keep the dogs in optimal shape.

During the Alpine Agility Open race, Dr. Chiara Chiaffredo used the Multi Radiance Super Pulsed MR5 Activet PRO laser.

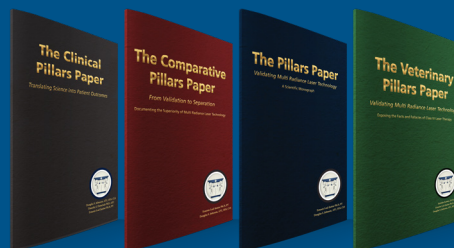

“

In my work in the field I need an effective and mobile device to help recover and prevent injuries of dogs, I have used the MRM laser which offered me very fast results. It is safe to use, comfortable for the dogs to apply and has a long-lasting battery.

The blue light has helped me fight infections. I am also working with endurance dogs and like with agility, the dogs get injured very often by twisting and turning. MRMs laser has shown great effectiveness whether its working on the joints, muscles or tendons.”
